Subject: Microsoft settlement

As a citizen, I find it very disheartening that so many states seem to see this suit as a means of generating revenue. The facade of protecting the "public interest" when really acting to put \$\$ in the State's Treasury is in itself a fraud against the public interest.

This is not the only instance of such behavior by the several states and I would ask the Justice system to recognize this transparent money-grab and deal fairly, openly and honestly with the issue at hand - i.e. what damage has been caused to the citizens - this is the essence of "public" interest; State Treasuries and their viability, although, are a "public interest" issue, robbery of private corporations to maintain such Treasuries is not.
